KWS APARTMENT BUILDING

FEELING AT HOME
ON THE CAMPUS

LIVING

ROOM FOR EVERYTHING:

Training, relaxation, get-together

Ever since the opening of our new apartment building in July 2013, we offer our course participants the possibility of comfortable living on the campus of the KWS. Privacy of the apartment, conviviality in the kitchen or stress reduction in the fitness room—the different parts of the building allow maximum scope. Short ways to the training center break up the daily training routine and permit a more efficient timing. If desired, the course participants may have breakfast and lunch directly next door, in the canteen of the KWS.

- TV and WLAN in all apartments
- Different leisure rooms
- Common kitchen
- Library

LEISURE

INDOORS OR OUTDOORS?

Countryside or City?

The unique location of the KWS—surrounded by nature on the one hand, situated on the edge of a lively metropolis of the Ruhr region on the other hand—opens up various possibilities beyond training and learning. In the city of Essen and its surroundings visitors may experience (industrial) culture, shopping facilities and entertainment suiting everyone's taste. Those who prefer to stay in the countryside may visit the Ruhr meadows or Lake Baldeney, which invites people to take a walk as well as to use the opportunity of surfing and sailing. And those who prefer to stay on the campus will find numerous possibilities to spend their time:

- Garden with BBQ area, outdoor chess and table tennis
- Fitness and leisure rooms with pool table and table football
- Meeting-Point with XXL TV
- Roofed patio

LEARNING

INDIVIDUALLY OR TOGETHER—

Optimal learning conditions

Primarily learning is the main concern on the campus of the KWS, because that is what our participants come for. To create the conditions for optimal learning results was the main object for the design of our apartment building. This includes a comfortable working environment as well as up-to-date technical equipment. Light and spacious working rooms are freely accessible at any time and are, as a matter of course, equipped with all usual means for work.

- Light rooms for a comfortable working environment
- Common rooms offer plenty of space for group work
- Tools as beamer and flip chart are always available
- Silence in the apartment for intensive individual work
